
Bring in Enrolment from Other Courses

Course Meta link (Meta Course)

The Course Meta link plugin makes it possible for one course, called a Meta course, to bring in enrolments from other courses. The Course Meta link plugin has to be enabled within the course.

Course settings for Course Meta link

1. In a course you want to bring in enrolment into, click the 'Enrolment methods' link in the 'Administration' block.

2. Click the dropdown menu under the enrolment methods and select 'Course meta link'.

Name	Users	Up/Down	Edit
Manual enrolments	13	↓	✕ 👁 👤
Guest access	0	↑ ↓	✕ 👁
Self enrolment (Student)	1	↑	✕ ✂ ⚙

Add method

Course meta link ▾
 Choose...
 Self enrolment
 Course meta link

3. Select from the dropdown box the course you wish to bring enrolments from and then click 'Add method'.

▼ Course meta link

Link course*

Note 1: A teacher in a course will only be able to choose from courses they are teachers in.

Note 2: To add more courses, add another instance of the course meta link.

4. The users from the child course will now be enrolled in the current course - see the numbers in the screenshot below:

Name	Users
Manual enrolments	13
Guest access	0
Self enrolment (Student)	0
Course meta link (American Movies Module 2)	4

Add method

Note: When new users are enrolled to the child course, they will be automatically brought into the current Meta course. By default all role assignments from child courses are synchronized to Meta courses. However, the "Roles that are not synchronized to Meta courses" setting enables administrators to exclude particular role.
