
Turnitin Assignment

What is Turnitin?

Turnitin is an online service which can check students' work for potential plagiarism by text matching against the world's largest comparison database. The database includes internet pages, journals, periodicals etc. and student essays previously submitted. It produces an originality report which indicates the percentage of text matched.

Turnitin is integrated into iSpace. Turnitin assignments can be set up in any courses in iSpace. Teacher can upload students' work for checking. Students can use Turnitin at any time to check their own work.

Document formats that are acceptable for uploading are:
